## PROFESSIONAL SUMMARY

Medical doctor and pharmacovigilance professional with 6.5+ years of experience across global medical review, ICSR case assessment, literature triage, safety database operations, audits, aggregate reporting support, and medical review process improvement. Experienced in seriousness confirmation, expectedness/listedness assessment, causality review, MedDRA/event coding support, company comment rationale, follow-up adequacy, expedited reporting timelines, and cross-functional collaboration with case processing, safety science, and global safety teams. Recognized for training medical reviewers, supporting SOP/process creation, handling operational escalations, and contributing to automation initiatives that improved medical review efficiency.

## CORE COMPETENCIES

- Global medical review of ICSRs: literature, post-marketing, study and spontaneous cases
- Seriousness criteria, expectedness/listedness assessment, causality review and company comments
- MedDRA / event confirmation and coding convention support
- Follow-up adequacy, case quality control and expedited reporting timeline compliance
- Safety databases: Argus, ArisG and Veeva Safety implementation/support
- Signal detection, aggregate reporting inputs, DSUR, PSUR/PBRER and RMP support
- US/EU/MHRA drug safety awareness, CIOMS and ICH guideline-based PV operations
- SOP development, process harmonization, audits, inspection readiness and CAPA support
- Stakeholder communication, query resolution, work delegation, mentoring and training

## PROFESSIONAL EXPERIENCE

**Pharmacovigilance Lead | Indegene | Bengaluru 07/2025 to Present**

- Lead medical review and signal detection activities for literature, post-marketing, study and spontaneous cases, ensuring case assessment quality and timely review.
- Perform and oversee non-serious case triage activities, act as process POC, and coordinate associates involved in the workflow.
- Train new medical reviewers on medical review expectations, case assessment quality, and operational process requirements.
- Drove automation of secondary activities, contributing to estimated savings of 3 Medical Reviewer FTEs.
- Support case assessment consistency through query handling, work delegation, and cross-functional coordination with operations stakeholders.

**Assistant Manager | Wipro: Novartis | Pune 08/2024 to 03/2025**

- Triaged literature articles and performed medical review of literature reports involving company products.
- Reviewed safety information for medical relevance, case identification, product-event context, and applicable case processing actions.
- Handled case processor team queries and provided medical review inputs to support compliant downstream processing.

**Lead Medical Reviewer | Teva Pharmaceuticals | Bangalore 02/2023 to 07/2024**

- Processed and reviewed ICSR reports while supporting timely submissions to regulatory authorities.
- Provided clinical and medical review inputs for DSUR, PSUR/PBRER and related aggregate safety documents.
- Worked on testing and implementation of a new Veeva Safety database, supporting workflow stabilization and user adoption.
- Acted as SME and trainer for medical review activities, transformation projects, SOP creation and process build-out.
- Collaborated with global and cross-cultural teams, including onsite project training and workshop participation.

**Medical Safety Physician | Clario (Bioclinica) | Mysore 02/2021 to 02/2023**

- Processed ICSR reports and supported timely regulatory submissions in line with project requirements.
- Processed legal cases and performed QC of ICSR cases to support case quality and compliance.
- Managed workflow allocation, prioritization and delegation for the medical review team.
- Acted as a POC between leads, managers and the medical review team to support smooth project delivery.

**Medical Officer | PHC Government of Karnataka | Madikeri 03/2020 to 01/2021**

- Treated patients in OPD settings and managed primary health center operations with healthcare staff.
- Implemented national and state health programs at ground level, supporting clinical and public health delivery.
- Managed a COVID care center during the first wave, coordinating patient care and operational priorities.

## EDUCATION

- MBA in Data Science and Analytics, Yenepoya University | Ongoing | 2026 to 2028
- MBBS, A.J. Institute of Medical Science and Research Center, Mangalore | 2014 to 2019
- Internship, A.J. Institute of Medical Science and Research Center, Mangalore | Feb 2019 to Feb 2020

## CERTIFICATIONS

- Certification in Signal Detection and Management, Uppsala Monitoring Centre (UMC)
- Certification in Aggregate Reporting, Udemy
- Certification in Signal Management and Risk Management Plan (RMP), Udemy

## SELECTED ACHIEVEMENTS AND PROJECTS

- Runners Up in National Level Forensic Medicine Quiz.
- Contributed to AI-enabled initiatives for automating labeling support for ICSR cases and conversion of safety documents into XML formats.
- Worked on AI/automation concepts aimed at supporting healthcare and pharmacovigilance process efficiency.
